BRUSHLESS

EVOLUTION

CORDLESS

BRUSHLESS MOTORS
reduce friction – better runtime and longer tool life.

High capacity battery packs offer even longer run-time in a very compact size.

Efficient gearboxes increase runtime and durability.

Intelligent electronics module improves performance.

Tough tools engineered for extreme environments.

XTREME RUNTIME

A standard motor contains carbon brushes which generate friction. The **XR BRUSHLESS MOTOR** eliminates this wasted energy, maximising the runtime and life of the tool.

Cooler running Brushless motor – longer runtime and longer tool life.

Standard Brushed motor – Energy from the battery wasted as heat.

RUNTIME
WHAT CANNOT BE
BEATEN

Take the runtime challenge!

Danny, Joiner – “I hung over 100 doors within a new hotel development on a single charge using my new DCD795M2. I couldn't believe it, after 3 days it just kept on going”

Think you can do better?

Send your extreme story to our panel of experts for the chance to win. For more information on the DeWALT XR Range, visit **DeWALT.com**

PERFORM PROTECT™

In 2007, **DEWALT** set itself the challenge of creating the most comprehensive system of the safest, highest performing professional construction tools in the world. This is the **Perform & Protect** system, made up of products that meet strict criteria in one or more of the following core safety-focused areas: **Vibration; Control; Dust.**

DUST

Industry-leading dust extraction solutions

When the **Perform & Protect shield** is awarded for dust, it is guaranteed the potential of inhaling dust is dramatically reduced to give a cleaner and safer working environment.

Dust-sealed dashboard switches for increased durability

AirLock™ system allows quick, secure, rotatable connection to power tool

Tough front castor design to withstand job site conditions

DWE46170 model shown

Automatic filter clean system pulses every 15 seconds maintaining constant suction levels

Rugged telescoping handle for easy mobility around site

Large rubber wheels for easy movement over uneven job site terrain

NEW

DWE46170 180mm Surfacing shroud

Respiratory disorders and diseases can take years to develop – act now to protect yourself and those around you.

These vacuum cleaners permit picking up dusts from dust classes L and M. These include all health endangering, non-carcinogenic dusts with OEL values > 0.1 mg/m³ and hardwood dusts.

Up to 50% vibration reduction*

When the **Perform & Protect shield** is awarded for vibration, it is guaranteed that Tri-Axial vibration levels have been reduced, increasing usage time without reducing performance.

VIBRATION

8.8 m/s²
Vibration Rating

Rounded gear box for better handling. Especially in chiselling applications

Excellent power to weight ratio: 12 joules of impact energy delivered by a 6 kg hammer

The NEW XR Cordless framing nailer DCN690

- The world's first battery powered 90mm framing nailer
- No gas cartridges required and no regular cleaning means low running costs
- Low vibration

Active Vibration Control system incorporating a floating rear handle and damped side handle to reduce vibration

Unique and innovative torque control features

When the **Perform & Protect shield** is awarded for control, it is guaranteed that additional innovative torque control safety features have been incorporated into the design of the tool.

CONTROL

Electro-Mechanical E-Clutch Drills

New motor gives improved performance in applications with dry core bits up to 127mm in bricks or soft masonry

Heavy duty 16mm chuck allows quick bit change whilst offering excellent bit retention

Electronics provide e-clutch, power up and overload protection

Electro-Mechanical clutch increases user control and protection

* Vibration comparison between models D25501 and D25601K.
